# The Book of Life

In the book of life, the answers aren't in the back.

— Charlie Brown

He that overcometh, the same shall be clothed in white raiment; and I will not blot out his name out of the book of life, but I will confess his name before my Father, and before his angels.

— Revelation 3:5

**T**his chapter is a summary of the archetypal meanings and alchemical relationships of each of the major arcana.

## Archetype

The archetype of a card is its individual essence, energy and form and is composed of several elements.

**Energy.** This is the card's energetic orientation: feminine (receptive, creative) or masculine (active, conceptive).

**Number.** This is the card's medicine, gift or archetypal healing power in the Twenty Count.

**Type.** This is the aspect (emotional, physical, mental or spiritual) of the card's psychological type (feeling, sensation, thinking or intuition).

**Light.** This is a description of the light side of the archetype.

**Shadow.** This is a description of the dark side of the archetype. "Dark" here is not a moral judgement but means whatever is unconscious (that is, what is in the shadows and not illuminated by, and acceptable to, consciousness) or whatever is opposite to the light side of the archetype. Everything contains its opposite which will jump up and live sometime, somewhere.

## Alchemy

The alchemy of a card tells you about its relationships with other cards, where it has come from and what it will become.

**Medicine.** This is the summary statement of the card's Shield, Mood and Movement.

**Keeper, Holder and Teacher.** These describe what Shield it Keeps, what Mood it Holds and what Movement it Teaches.

**Awakener, Dreamer and Completer.** These describes its energetic relationships according to the Zero to Nine Law (Chapter 9).

In a reading, the alchemy will suggest linkages with cards in other positions in the reading.

The alchemy does not apply to the 0 and 1 cards (the Fool and the Sorcerer) as they sit outside the matrix of the other 20 cards. They contain, and are contained by, all the other cards so their alchemy is undifferentiated. All subsequent cards are energetic transformations of the original 0 and 1.

I have left blank the alchemy of some of the cards so that the reader may add their own interpretations.

Although this book does not cover the advanced alchemy of the cards I have added the higher alchemical name for each card.
